## Technical Work Experience

### Berry Consultants LLC

Remote

Software Engineering Intern

May 2026 – Aug 2026

- Applied Bayesian optimization to Continual Reassessment Method's (CRM) skeleton prior, boosting average accuracy by 3.93% in a 3 profile run over mTPI-2 and saving future trial designers substantial time.
- Developed an automated rules checker for company phase 1 dose escalation simulation software; uncovered 8 bugs and managed software design to account for future fixes.
- Implemented automated mutation testing to verify rule checker code, eliminating false negatives across simulation runs.

## Technical Projects

### Android Financial Application ("Colloney")

Java, Android Studio, XML, Git, GitLab

Frontend Developer (Team of 4)

Jan 2025 – May 2025

- Conceptualized the app's gamified product vision and directed frontend design, creating interactive budgeting tools tailored for college students.
- Developed several frontend features including auth, live banking, chatroom, and an AI chatbot while overhauling team layouts (stocks and news feeds) to ensure visual consistency and usability.
- Led a mid-project refactor of the frontend to clean up code consistency, improve component reuse, and ease code maintenance.

### Self-Hosted Media Server & Home Lab

Fedora Linux, Podman, Tailscale, Navidrome

Systems & Network Administrator

July 2026

- Configured a rootless Podman environment on Fedora Linux to host Navidrome, Lidarr, and automated media management tooling.
- Set up an encrypted Tailscale mesh network, enabling smooth, low-latency media streaming for remote devices.
- Mapped storage mounts using systemd and fstab to maintain persistent volume data across container updates.

### RISC-V Virtual Processor

VHDL, RISC-V Architecture

Hardware Developer

Aug 2024 – Dec 2024

- Designed single-cycle, software-scheduled, and hardware-scheduled virtual processor variants using VHDL.
- Wrote RISC-V assembly routines capable of running matrix multiplication (Grendel algorithm), merge sort, and Fibonacci calculations directly on the hardware.

## Education

### Iowa State University

Ames, IA

Bachelor of Science in Software Engineering | GPA: 3.82 / 4.00

Expected May 2027

**Activities & Involvement:** DIS Student Leader, Competitive Programming Club, CSE Club, Run Club, Cy's Locker Room Game Day Worker

## Technical Skills

**Languages:** Java, JavaScript/TypeScript, Python, C

**Frameworks & DSLs:** React, Tailwind CSS, HTML5, CSS3, SQL

**Tools & Infrastructure:** Linux (Fedora), Git/GitHub, Postman, Neovim, Tmux, Vite

## Additional Work Experience

### Various Employers

Ames & Waterloo, IA

Student, Food Service, & Retail Operations (16–40 hrs/week)

Aug 2023 – Present

- Maintained steady part-time and full-time employment alongside a heavy Software Engineering course load.
- **Lowe's:** Seasonal Retail Associate (Summers 2024, 2025). Re-hired for back-to-back summer seasons.
- **Hickory Park:** Kitchen Staff (Sep 2025 – May 2026). Handled high-volume food prep and back-of-house workflow during peak shifts.
